

***Prevention and Implementation Science: Challenges ahead for implementing preventive strategies in oncology***

**11:30am-1:30pm (AEST) Sydney time** Wednesday 8 December

[Register here](#)

Any form of research, or any stage of a research project, should include considerations of implementation [and how to grow the science]

This session will introduce the *National Preventive Health Strategy* and how this aligns with PoCoG's focus areas of cancer prevention, early detection and implementation science.

Three sessions will focus on address topical issues in pre-implementation planning for cancer screening, cover innovations in trial methodology for adaptation of interventions in practice and grapple with sustainability of post-implementation in health promotion and cancer prevention programs.

**Confirmed speakers:** Professor Don Nutbeam, Dr Carolyn Mazariego, Dr Nicole Rankin, Dr Rachael Dodd, Ms Louise Baldwin, Dr Deonna Ackerman, Professor Marina Reeves or Professor Liz Eakin

**Chaired** by Dr Monika Janda

This webinar is a collaboration between Prevention and INSPIRE SIGs of PoCoG

**Session Run Times:**

**11:30 – 11:35** - Introduction and acknowledgement of country (**Dr Monika Janda**)

**11:35 – 11:55** – Overview of the National Health Prevention Strategy (**Prof. Don Nutbeam**)

**11:55 – 12:05** – Considering implementation at all stages of research (**Dr Carolyn Mazariego**)

**12:05 – 12:30** – SESSION 1: Prevention and implementation strategies in pre-implementation research panel

- **A/Prof. Julia Brotherton** – Cervical cancer
- **Dr Rachael Dodd** – Lung cancer awareness strategies

**12.30-12:55** SESSION 2: Implementation strategies *during a prevention/early detection trial*

- **Dr Deonna Ackerman** – what are SWATs and how can you use them to adjust intervention delivery and success?
- **Dr Nicole Rankin** – Lung cancer pre-implementation data: what do we know about strategies to encourage participation in lung cancer screening?

**12.55-1:25** - Strategies in *post-implementation of a trial*

- **Ms Louise Baldwin** - what does it take to design a sustainable cancer prevention program – outcomes of a Delphi Process?
- **Prof. Marina Reeves and or Prof. Liz Eakin** – Healthy Living After Cancer: how is sustainability built into the HLAC and where is the program now?

**1.25 –1.30** Wrap up and close seminar
